RestoRation	Description	PG	Raid	PG Number	Raid Number	in Game Ui
---- Healing ----						
Heal Pets	Will allow pets to enter in the healing engine as if they were DPS.	✗	✓			
Special Heal	A selector to what you would prefer, healing Special Units via Mouseover or directly trough the engine.	✗	✗			
Special Priority	Put Special Unist to Top Priority for Healing in Engine.	✗	✗			
Blacklist	If checked, you can use "/blacklist" macro to blacklist units that you do not want to heal. Those will be stored in your blacklist FOREVER. You can use "/blacklist" again if you want to remove them from the list. Additionally, you can use "/blacklist clear" to empty the list and "/blacklist dump" to print the list to your chat. The option let you choose how much you want to add to blacklisted units. The effect can be seen directly in the healing engine frame.					
No Absorbs	If you ever want to compete for healing meter, checking this will ignore all shielding effects.	✗	✗			
No Incoming Heals	Again, a setting to help you top meters. This feature ignores other healers incoming heals.	✓	✗			
Overhealing Cancel	Enables the use of Rejuvenation with Meta Socket Buff Without Health Check	✓	✓		100	
Engine Debug	This amazing frame will help you see live what is going on. How the engine react in particular situations.	✗	✗			
Engine Refresh	This option is a timer to prevent updating engine too often. it could be around 100 ms to lighten processing. Use this on low-end machines only.				100
